DVD Artwork

Background

Thee Backslacpkping with Media is a "documediamentary" (pseudo-analytical narrative) of the media coverage of the movie Star Wars: Episode III – Revenge of the Sith.

It was envisaged as a response to the 'backstroke of the west' subtitles, 133t Trailer censoring and Elite Torrent takedown.

The creator, %20, also intends for the project to become a seed for an alternative type of media interaction.

Project Details

This DVD is a combination of documentary and media analysis, edited together, to create a presentation that focuses on media portrayals of news and entertainment topics.
