&lt;scott8521&gt; krylon isn't even here

&lt;scott8521&gt; duff disable our accounts

&lt;scott8521&gt; and is mia

&gt; duff resigned

&lt;scott8521&gt; i'm starting to think you're duff

&lt;scott8521&gt; with the derkader@208.53.170.207 and the g\_ vs the G\_

&lt;scott8521&gt; i hear someone killed krylon and duff when they were making love in the back of his truck too

&gt; never said i was g

&gt; or wasnt duff

&lt;scott8521&gt; haha

&lt;scott8521&gt; &lt;3

&lt;scott8521&gt; why'd you disable our accounts?

&gt; because im not in et anymore

&lt;scott8521&gt; what are you in now?

&gt; nothin

&gt; im done with torrents

&gt; not that you fall in the category

&gt; but 96% of ets staff is fuckin retarded asshats

&lt;scott8521&gt; thanks, i guess

&gt; your not an asshat

&gt; trust me

&gt; your cool.. g.. stony.

&gt; bones

&gt; skot has issues

&gt; he fucked everyone in a way

&lt;scott8521&gt; which way?

&gt; well its just something i heard but he lost his top access

&gt; cause he leeched a bunch of mp3s

&gt; like 200gb

&gt; instead of usin it for et

&gt; like i said.. just what i heard but believable enough for me

&lt;scott8521&gt; yeah

&gt; i did to much for et just to have krylon who is never fuckin around to undo my decisions

&gt; or make decisions without me

&gt; yeah its his site.. but he appointed me to run it.. let me fuckin run it how it should be

&gt; and dont bitch when other sites beat us cause you fuck it up

&lt;scott8521&gt; explains why we haven't had anything to upload in a month or so

&gt; if he was around often enough that would be one thing

&gt; well expect krylon around less n less

&gt; if its possible

&gt; i give it a month before et is gone

Session Time: Fri Apr 29 00:00:00 2005

&gt; unless krylon makes actual appearances

-&gt; \*[sk0t]\* remove my admin title plz?

&lt;scott8521&gt; i've heard he actually makes money off the donations, because there are so many

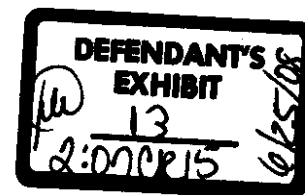

&lt;scott8521&gt; the servers don't cost too much

&gt; you'd be surprised

&gt; im sure he dont make much off that

&gt; but he has other income now

&lt;scott8521&gt; doing what?

scott8521.EFnet.log

```
> dunno for sure
<scott8521> what's the point of the starting one of the biggest torrent sites in the
world if you don't do anything..
<scott8521> i rarely saw him, and when i did it was to have people fetch him goodies
> he just ignores warnings from us
> us being me and stony
> why you think stony left?
<scott8521> i thought it may have been the mis-hap me and him had the previous day
> it wasnt
> stony just tired of same ol shit as i am
> few good uploaders but to many asshats
<scott8521> the ones that were actually around were good ones
> i dont have the patience to deal with krylon
<scott8521> the other ones just went with the wind
> since he is here so little
> i cant get shit done
> well krylon forced 2-3 good uploaders out
> cause they had other ties
> ties which shouldnt have made any diff
> again despite my warnings he did that
> if you'd believe it
> krylon gave all admin plus 2 others top acces
> never gave it to me though
> not that i really give a shit bout that.. i get everything i need
<scott8521> if krylon doesn't get on in the next day or two, ALL the uploaders will
be gone
> but everyone would agree if i had top access.. et would beat everyone if we had
enough uploaders
<scott8521> most definatly
<scott8521> you knew how to run things, and keep them in order
> well i havent even totally pulled my box from et yet
> g still uses it a bit
> few people still have access
<scott8521> you just randomly disable people on the list?
> only the admins and fillers have access i belivee
> cept krylon
<scott8521> we have virtually no fillers
<scott8521> i don't know who they are, and i've never seen them around
<scott8521> and we have nothing to upload
> yeah hopefully krylon will notice
<scott8521> i've pmed him multiple times offering, and he says "no, we have plenty"
> yeah he is being ignorant
<scott8521> i have no idea who could/would fill your spot
<scott8521> if krylon doesn't appoint someone to do his work, it will be dead
<scott8521> and it will be very hard to resurect
<scott8521> so you just going to go back to a normal life?
> for now
<scott8521> i still need to figure out how to get implicit SSL working on my g6
server :/
<scott8521> well, anywho goodluck to you and your future endeavors
> keep in touch
> ill be on irc still somewhat
> as duffman
<scott8521> did you use a tut to get your SSL working?
> didnt have to
> go to IP binding on domain
> doubleclick that item in list
> make sure its ssl
<scott8521> i think i setup my server very wrong :/
<scott8521> my admin thing for g6 won't goto the server
> when you install it dont change any default options really
> messes up
> which version do you have
```

scott8521.EFnet.log

```
<scott8521> 3.4.0 build 16
<scott8521> right now i'm just getting an error "cannot establish connection with
host: 127.0.0.1:8081"
> did you put in 80801?
<scott8521> no
<scott8521> this was all working fine until a few minutes ago
> totally remove
> see
> your trying to connect into the server on 8081
> but installation you cant change the actual port
> just what port you will connect to it on
> its complicated
> just reinstall and leave that port alone
> during install
> leave it default
<scott8521> isn't 8081 default?
> mines 8021 default
<scott8521> i really screwed this up :/

<scott8521> maybe it's just my part of fdc, but i can't seem to transfer very
quickly on ftp
<scott8521> the speeds jump up and down, and don't stay constant like your
<scott8521> yours
<scott8521> any idea?
<scott8521> guess not
