```

                                #etuploaders.EFnet.20050304
[00:53:35] 11@DPG : just tonight?
[00:56:10] 11@mb- : heh
[00:56:12] 11@awox : work for me

[00:57:59] 11@awox : leaving now
[00:59:27] 11@mb- : umm duff, enable multi-logins so i can thread that shit :)
[01:00:17] 11@duffman : you can
[01:00:42] 11@mb- : log says no more connections allowed for this ip
[01:00:47] 11@mb- : :)
[01:00:54] 11@duffman : try now
[01:00:54] 11@duffman : ;)
[01:01:02] 11@duffman : you can on main one anyways
[01:01:27] 11@mb- : yeah my client doesn't do implicit ssl threading, only
plaintext and explicit
[01:01:38] 11@mb- : thats much betta
[01:02:05] 11@duffman : well i can do one server that is one port that combines
explicit and plaintext
[01:02:15] 11@duffman : which is probably what ill end up switching too
[01:02:34] 11@mb- : what ftp daemon is that?
[01:03:09] 11@duffman : g6
[01:03:14] 11@mb- : so bizarre that it only pulls like 500k/sec per thread, but i
can just keep stacking them no problem
[01:03:22] 11@mb- : v2 or v3?
[01:03:26] 11@duffman : its fdc
[01:03:28] 11@mb- : er v3
[01:03:33] 11@mb- : v2 doesn't do ssl heh
[01:03:38] 11@duffman : 3.4
[01:03:50] 11@duffman : i like it
[01:03:55] 11@mb- : have you done ssh tunneling before?
[01:04:01] 11@duffman : no
[01:04:06] 11@DPG : too slow
[01:04:11] 11@mb- : slow?
[01:04:20] 11@mb- : i pull 5-6mb/sec over ssh tunnels
[01:04:33] 11@DPG : exactly
[01:04:36] 11@DPG : too slow
[01:04:41] 11@neeksor : ehe
[01:04:48] 11@neeksor : ssh tunneling for ftp is retarded
[01:04:58] 11@mb- : so is ssl
[01:05:11] 11@mb- : both are high bit cyphers which slow throughput
[01:05:24] 11@mb- : ssh tunnels don't require the ftp client to do anything
though, thats whats good about it
[01:06:26] 11@mb- : tell your tunnel what local port to listen to, what ssh server
to connect to and what ip/port to connect to on the other side of the tunnel and
you're good to go
[01:06:39] 11@duffman : mb..
[01:06:44] 11@mb- : ?
[01:06:48] 11@duffman : punker is currently raping the bw.. transferring
internally
[01:07:03] 11@mb- : i'm cool, doing about 20mbit myself heh
[01:07:17] 11@duffman : well he is certainly takin the oher 80
[01:07:20] 11@duffman : ;)
[01:07:21] 11@mb- : lol
[01:07:25] 11@duffman : i just looked and saw 4mB/sec
[01:07:27] 11@duffman : +
[01:08:42] 11@mb- : i love how my port isn't able to cap me at the 20mbps
limitation they put me on lol
[01:18:08] 15UGLArmy : yo guys
[01:18:12] 11@mb- : what kind of throughput did you do all day duff? i was getting
murdered on xfer rate earlier today

```

[12:02:26] 11@Punker22 : Level3 is having serious latency issues yesterday/today
[12:21:51] 11@TFArchive : is the L3 that FDC has real Level 3 or is it yipes
bandwidth? there seems to be a constant debate on WHT about it. Steadfast seems to
have a major bone against FDC, hehe
[12:22:50] 11@Punker22 : Steadfast was hosted @ FDC for a long time till they
moved to equinix
[12:23:02] 11@Punker22 : the head of steadfast is a jackass
[12:23:27] 11@TFArchive : ah, hehe. And what's this about FDC not having backup
power/UPS setups
[12:23:36] 11@Punker22 : they don't need it
[12:23:45] 11@Punker22 : FDC is feed from 6 different power grids
[12:24:04] 11@Punker22 : the entire surround states would have to go out for FDC
to lose power
[12:24:08] 11@Punker22 : *surrounding
[12:24:47] 11@TFArchive : wow, I've never heard of that king of a setup must be in
the corner of several grids
[12:24:51] 11@TFArchive : *kind
[12:24:58] 11@Punker22 : it is CBOT building
[12:25:04] 11@Punker22 : very very important building
[12:26:22] 11@Punker22 : in 3.5yrs FDC hasn't even had so much as a power blip
[12:26:41] 11@TFArchive : must be a federal building or something
[12:26:53] 11@Punker22 : Chicago Board Of Trade

[13:11:34] 11@TFArchive : you having speed issues too?
[13:12:27] 11@mb- : somefin up at fdc?
[13:13:39] 11@Punker22 : Feeling^ as i said the extra Gig-E is being added
middle/end of this month
[13:13:51] 11@TFArchive : some issues with L3 apparently. I can't get over 10mbit
on my torrents and downloads to home connections were very slow last night, ie under
30KB/s for some :(
[13:14:03] 11@Punker22 : hrm
[13:14:10] 11@Punker22 : TFA thats really odd
[13:16:56] 11@Feeling^ : tf
[13:16:59] 11@Feeling^ : i get that
[13:17:02] 11@Feeling^ : 30k to my home
[13:17:06] 11@Feeling^ : but im on cogent
[13:17:08] 11@Feeling^ : :o
[13:17:18] 11@Feeling^ : seeds torrents fast tho :p
[13:17:42] 11@Punker22 : Feeling^ your on Level3/Cogent
[13:17:51] 11@Punker22 : just it takes cogent to you for some reason
[13:18:14] 11@Feeling^ : i dont get routing
[13:18:20] 11@Punker22 : lol
[13:18:23] 11@Feeling^ : there a website to explain it?
[13:18:25] 11@TFArchive : yeah, I'm still always cogent for some reason, the
traces look good but speed isn't always
[13:19:07] 11@Punker22 : well what i'm going to do once the new Gig-E goes in is
attempt to get all of my space routed via new gige and l3
[13:19:59] 11@TFArchive : that would be cool, ATT or abovenet should be good to
more sites :)
[13:20:07] 11@Punker22 : yep
[13:20:25] 11@TFArchive : or they could just put the new gig-e to you directly,
hehe
[13:20:27] 11@Punker22 : i think they're going with Abovenet, i'm not sure tho b/c
ATT is double the price
[13:21:27] 11@TFArchive : have they booked the new lines for the new DC. I assume
cogent/L3 again
[13:21:47] 11@Punker22 : not yet
[13:22:08] 11@Punker22 : i think they are going to shy away from L3 a bit on the
new one maybe go with more of a mix
[13:22:23] 11@Punker22 : L3 had router problems and kinda screwed them a bit, Petr
was pissed
[13:22:42] 11@TFArchive : still goign to be 'unmetered' though?
[13:22:45] 11@Punker22 : yea
[13:23:45] 11@TFArchive : yeah, I heard about those problems, seems sort of odd
that L3 would gerk them around seeing as they pay them probably $1 M a month for the
line
[13:25:05] 11@Punker22 : apparently L3 has just been going shoddy everywhere of
late tho
[13:25:32] 11@TFArchive : they're turning into the cogent of old :(
[13:25:45] 11@Punker22 : TFArchive the RAM will be done today

[13:32:13] 11@Punker22 : ?
[13:32:18] 11@Punker22 : what happened lol
[13:33:00] 11@TFArchive : UGLArmy was running his box at 100mbit 24/7. they capped
him to 1mbit, hehe. He got them to remove it by agreeing to limit it to 15TB a month
or so
[13:33:08] 11@Punker22 : ho ya
